

a recovery area. However, the Service cannot honor a request to reclassify an alleged remnant grizzly bear population in the San Juan Mountain range based on inclusive evidence of the presence of grizzly bears. Any grizzly bear population that may exist in the San Juan Mountain range remains listed as threatened and retains protection under the Act.

After a review of the petition, the Service found that the petitioners did not provide any new or substantial evidence that their petitioned action to reclassify the grizzly bear in the San Juan Mountain range from threatened to endangered may be warranted.

Endangered and Threatened Wildlife and Plants; Finding on Petition To List the California Red-legged Frog

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces a 12-month finding on a petition to amend the List of Endangered and Threatened Wildlife. After review of all available scientific and commercial information, the Service has determined that, pursuant to the Endangered Species Act of 1973, as amended (Act), listing the California red-legged frog is warranted. Accordingly, the Service will publish promptly a proposed regulation to list this species.

DATES: The finding reported in this document was made on July 13, 1993.

Comments and information may be submitted until further notice.

ADDRESSES: Written comments and materials concerning this petition finding may be submitted to the U.S. Fish and Wildlife Service, Sacramento Field Office, 2800 Cottage Way, Room E-1803, Sacramento, California 95825-1946. The petition, finding, supporting data, and comments received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Peter C. Sorensen, Sacramento Field Office (see ADDRESSES section) at 916/978-4866.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(B) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), requires that a finding be made for any petition to revise the Lists of Endangered and Threatened Wildlife and Plants that presents substantial scientific and commercial information within 12 months of the date of receipt of the petition. The finding must indicate whether the petitioned action is (a) not warranted, (b) warranted, or (c) warranted but precluded from immediate proposal by other pending proposals. Such 12-month findings are to be published promptly in the **Federal Register**. If the finding is that the action is warranted, section 4(b)(3) also requires a prompt publication in the **Federal Register** of a proposed regulation to implement such action.

In a petition dated January 15, 1992, which was received by the Service on January 29, 1992, Mr. Dan Holland and Drs. Mark Jennings and Marc Hayes requested that the Service list the California red-legged frog (*Rana aurora draytonii*) as an endangered or threatened species. The petition specified endangered or threatened status by drainages (watersheds) within the range of the species. The petition cited numerous threats to the species, including loss and degradation of wetland and terrestrial habitat, predation by introduced species, harvest, habitat fragmentation, and drought. The Service made an administrative 90-day finding on August 12, 1992, which concluded that the petition contained substantial information indicating that the petitioned action may be warranted. An announcement of this finding was published in the **Federal Register** on October 5, 1992 (57 FR 45761).

The California red-legged frog was included as a category 1 candidate in

the November 21, 1991, Animal Notice of Review (56 FR 58804) with a listing priority number of 3. Category 1 candidates are species for which sufficient information is currently available to the Service to support a proposed rule to list them as endangered or threatened. The Service finds that the petitioned action is warranted due to habitat loss and degradation, predation, inadequate regulatory mechanisms, past drought, and recreational activities, which imperil the continued existence of the red-legged frog. Accordingly, the Service will promptly publish a proposed regulation to list the California red-legged frog.

Designated Critical Habitat; Northern Right Whale

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings on a proposal to designate critical habitat for the Northern Right Whale and extension of the comment period.

SUMMARY: On May 19, 1993 (58 FR 29186), NMFS proposed regulations to designate critical habitat for the northern right whale. The areas proposed for designation are portions of Cape Cod Bay, Stellwagen Bank and waters adjacent to the coasts of Georgia and Florida.
